

List of accepted papers: 8th icSoftComp2026

Note:

- This is a partial list of accepted papers.
- More papers will be included within a week.
- The acceptance emails have been sent to the authors of accepted papers. If you have not received it, please write an email to kanupatel.mca@charusat.ac.in.
- Authors are requested to complete the registration process as per the date mentioned in the acceptance email.
- If you have any queries, please email kanupatel.mca@charusat.ac.in

Sr.#	Paper ID	Title
1	1	Scale-Invariant Severity Grading of Structural Cracks via Multi-Domain Deep Learning
2	7	Multimodal Fusion Architecture for Arecanut Yellow Leaf Disease Detection using ViT and BERT
3	32	LiteFusion-CNN: A Lightweight Hybrid Feature-Fusion Model for Multi-Domain Visual Object Recognition
4	33	DLC: A Multi-Model, Adaptive-Precision Near-Lossless Compression Engine for High-Frequency Float64 Time-Series Telemetry
5	37	An Explainable AI Framework Based on Transfer Learning for Tuberculosis Detection
6	41	NC-MedAI: Geometry-Aware Training via Fixed Equiangular Tight Frame Heads for Imbalanced Dermoscopic Skin-Lesion Classification
7	42	A Radiomic Framework for Non-Destructive Quality Grading of Arecanut from X-ray Images

8	45	Physics-Regularized Deep Unfolding for Joint Channel Estimation, Interference Prediction, and Resource Allocation in IoT Networks
9	49	Analysis of Students' Learning Paths in Online Educational Platforms
10	85	Human body Posture Classification and Analysis using Deep Transfer Learning
11	94	Overcoming Feature Toxicity in Multimodal Emotion Recognition via Heterogeneous Graph Neural Networks
12	95	An AI-based Virtual Screening Framework for Drug-Induced Liver Injury Prediction Using Molecular Descriptors
13	98	SAGE-GAT-HIDS: A Self-Supervised Graph Neural Network Framework for Label-Free Host-Based Intrusion Detection
14	105	Integrated Data Mining (NJB-LigToxTM) and Molecular Modeling Approaches for Predicting the Safety and Efficacy of Natural Inhibitors of Skin Tyrosinase
15	117	Automated Detection of Online Recruitment Scams Using Multinomial Naïve Bayes
16	118	System Design and Evaluation of a Coordinated Real-Time Fall Detection Platform for Institutionalized Elderly Car
17	122	Context-Aware Continuous Stress Prediction from Multimodal Smartphone and Wearable Signals
18	125	AdaptSumm: Adaptive Multi-Modal Document Summarisation System
19	131	A Proposed Framework for Alzheimer's Disease classification: Lobe-Wise Analysis
20	135	Three-Stage Network DEA for Long-Term Efficiency Optimization

21	149	An Enhanced Bio-Inspired Algorithm For Optimal Feature Selection for Deep Learning Based Mango Leaf Disease Classification
22	162	Future Perspicuity, Parental Influence, University Support, and On-Time Graduation Intention of Vietnamese Students: A Theory of Planned Behavior Perspective
23	164	LLM Vs Transformers: A quantitative and statistical evaluation of Movie Review Classification
24	168	Text Summariser using Fine-Tuned T5 Transformer
25	169	Robust Weakly Supervised Video Anomaly Detection through Training Signal Refinement
26	176	Hybrid GA-PSO Algorithm for Data-Driven Supply Chain Cost Optimization
27	186	Design and Performance Evaluation of a Hybrid Microwave–Resonant Inductive Wireless Power Transfer Architecture for Intelligent Electric Vehicle Charging Applications
28	194	Intelligent Medical Text Classification from Discharge Summaries Using Deep Learning-Based NLP Techniques
29	199	An AI-Driven IoT Mobile Framework for Real-Time Smartwatch-Based Smart Health Monitoring and Intelligent Alerting
30	210	Hyperparameter Tuning in Stochastic Gradient and Resnet Ensemble Approaches for Robust Flower Species Detection
31	219	Proton Exchange Membrane Fuel Cells parameter estimation using Adaptive Marine Predator Algorithm
32	221	Scored Temporal Graph Reconstruction of Attack Episodes from Noisy Flow-Based IDS Alerts
33	228	A Continual Learning Framework for Noise-Robust Surface Defect Discovery

34	230	Parameter-Efficient Continual Learning for Blood Glucose Forecasting using Frozen Time-Series Transformers and a Multi-LoRA Adapter Hub
35	237	BLOCKSHIELD: Network-Aware Reputation-Weighted Federated Intrusion Detection with Blockchain Anchoring for Large-Scale IoT Deployments
36	242	Quantifying Corrosion Severity using Bounded Box Area Ratios: A Novel Explainable Deep Learning Approach
37	246	Scalable Task Scheduling Algorithm for Cloud IAAS Using Marine Predator Algorithm
38	247	A Privacy-Preserving Federated Neuro-Fuzzy Framework for Smart Grid Stability Prediction with Multi-Objective Rule Optimization
39	250	SlideTuner: PowerPoint Slide Design via OOXML Generation and Preference Optimization
40	266	Risk-Aware Step-Up Authentication: A Dynamic Assurance-Level Model for Secure Patient Access to Health Data
41	275	Solution framework for AI driven Application Testing with Advanced Intelligent Systems
42	283	Empirical Analysis of Probabilistic Frameworks for Photometric Redshift Estimation Using SDSS Data
43	285	Quality-Conditioned Multi-View Fusion for Inter-Patient Arrhythmia Classification on the MIT-BIH Database
44	290	MArtAE: A Unified Architecture for Real-Time Audience Experience Analytics at Live Events
45	305	AME-CNN: A Compact Convolutional Neural Network for Automated Five-Class Ovarian Ultrasound Image Classification
46	309	Lightweight Image Encryption Using Bernoulli Map and CA Rule 90 for IoT Applications

47	320	Smart collaborative platforms for tourism experiences
48	333	ResQTrack: User-Centric Design and Prototype Validation of a Cloud-Integrated IoT System for Inclusive Disaster Preparedness
49	339	Attention Is Not Attribution: An Empirical Evaluation of Graph and Sentiment Models for Commodity-Shock Transmission
50	340	Myths of Large Language Models: Lessons Learnt from Explainable Artificial Intelligence
51	342	AI-Powered Facial Image Analysis for Personalized Anti-Aging Skincare Recommendations.
52	350	FL-QBAD: Federated Learning with Quantum Byzantine Anomaly Detection
53	353	A Software Architecture for EEG-Enabled Business Applications: Mock-Jury Analytics and Virtual-Reality Control
54	354	An Intelligent Software Suite for Generating Source Web Code Based on Recursive Analysis of Graphical Interfaces with Support for Various LLM Providers
55	355	Evaluating XGBoost and LSTM for Cross-Sectional Stock Selection: Nested Walk-Forward and Portfolio-Value Evidence
56	357	SummarEase: Document-grounded Structural Parsing and Domain-Adaptive Summarization for AI-Enhanced Academic Learning
57	363	Auditing Overfitting and Configuration Drift in a Bi-GRU GloVe Depression Detection Pipeline
58	371	Predicting Critical Quality Attributes of Lipid Nanoparticle Formulations Using Machine Learning: A Comparative Evaluation of Regression Algorithms
59	378	Decentralized Longitudinal Speed Control for Cooperative Platooning: A Physics-Informed Reinforcement Learning Paradigm and Benchmark

60	379	Continuous Over Discrete: A Unified Benchmark of Reinforcement Learning for Traffic Signal Control
61	381	Class-Specific Prompt Learning for Fine-Grained Sports Recognition Using CLIP: A Study on Sports-102
62	391	Quantum-Amplitude Perturbation Deep Reinforcement Learning for Vehicle Routing Problems
63	392	PayBand: A Secure Biometric and Audio-Guided Wearable Payment System for Visually Impaired Users
64	397	[Final] Resource-Efficient Skeleton-Based Lying-Posture Recognition: A Per-Frame Architecture Comparison
65	402	A Universal Dependencies-Based Framework for Part-of-Speech Annotation for Newari(Nepal Bhasa)
66	407	ViTraj++: A Vision-Enhanced Model for Traffic Trajectory Prediction
67	414	An Electric Vehicle Battery prognostics using LSTM model
68	424	HTS-Transformer: A Hybrid Tabular–Sequential Transformer Framework for Rainfall Classification and Environmental Monitoring—A Case Study in the Kurdistan Region of Iraq
69	430	A Human-centred Explainable Framework for Multi-Country Road Damage Classification
70	461	A Comprehensive Benchmark of Deep Learning Architectures for Tissue-Level Diabetic Foot Ulcer Segmentation
71	463	Neural Localisation of Fire-Induced Stiffness Degradation in a Steel Frame from Ambient Vibration Monitoring
72	464	Risk-Aware Multi-Modal LLM Agents with Memory for Cognitive Autonomy in Mars Exploration

73	465	Feature-Based Machine-Learning Detection of JUnit Test Smells: A Cross-Project Study on Apache Commons Libraries
74	467	From HEI Components to Monotonic Rule States: Survey-Aware Development of an Auditable Dietary Representation for Prevalent Metabolic Syndrome in NHANES
75	474	Human-Centred Orchestration of Generative Artificial Intelligence for Statistics Learning in Economics: An Expert-Validated Framework
76	475	Park Feedback Sentiment Analysis: an Approach Combining Word2Vec, XGBoost and Modified Variable neighborhood search
77	478	Assessing the Impacts and Predictors of Venture Capital on Vietnamese Green Innovation Startups Using a Data-Driven Approach
78	484	A robust simulated annealing framework with binary search and parallel computing for Type-II assembly line balancing with parallel workstations
79	485	Exact solver, simulated annealing and genetic algorithm for an opportunistic sensing optimization problem
80	497	Multi-Lens Explainability as a Verification Mechanism for Trustworthy Federated Intrusion Detection: A Conceptual Framework
81	505	MA-TBLF: Multi-Anchor Tail-Boosted Logit Fusion for Long-Tail Medical Image Classification
82	506	Bridging the Semantic Gap in Multimodal AI via Latent Visual Concept Discovery: A Case Study on Skin Lesion Diagnosis
83	507	A Robust Framework for Megakaryocyte Subtype Classification based on Knowledge-Alignment
84	510	DEEP-Depth: A PSO-Enhanced Hybrid System for Traffic Anomaly Detection, Vehicle Counting and 3D Scene Reconstruction
85	513	A Dynamic S-Box-Based Image Encryption Scheme for Secure Image Communication

86	514	DaVIL: Distance-aware Variance-in-Logits for Reliable Medical Image Classification
87	516	RS-TSB: A Rough-Set Guided Otsu-Morphological Segmentation Framework with Region-Adaptive Tinkerbell, Sine and Baker Chaotic Maps for Image Encryption
88	519	Real Time Privilege Escalation Detection Using eBPF and a Bag of System Calls ML Pipeline
89	524	KolamHS-Cipher: A Lightweight Hierarchical Scrambling and Diffusion Framework for Secure Color Image Encryption Using Kolam Patterns
90	535	A Miniaturized Single-Layer Dual-Band Directional Antenna for Smart IoT Sensors
91	539	Sequence Bounding Box Portfolio Method for Deep Learning Based Thin and Elongated Road Crack Detection
92	557	A Legal-Aware Sentence Importance Scoring Framework with Adaptive Sentence Masking for Abstractive Legal Document Summarization
93	563	Onboard Intelligence for Aerial Security: A Field-Validated Jetson Orin Nano, YOLOv8 and ROS2/PX4 Drone Surveillance Platform
94	564	AI-Driven Solid Dispersion and Semisolid Matrix Techniques for Enhancing the Solubility of Rilpivirine Hydrochloride Formulations
95	569	Adversarial Robustness of AI-Based Phishing Detectors in Financial Services
96	570	Doppler-Aware Quantized RIS Phase Design for Secure High-Mobility V2I Communication
97	574	Vector- $\mathbf{0}$ for Constraint-Rich Covering Linear Programs: Distance-Normalized Constraint Selection and Computational Analysis
98	578	Impact of Cognitive Alteration on Classification Performance in EEG Brain Computer Interface.

99	579	Deep Learning Architectures for Mitigation of Variations in EEG Characteristics based on Within-Subject Motor Imagery Classification
100	593	Explainable Stacked Ensemble Learning for Breast Tumor Classification Using Morphological Features
101	612	An Explainable EEG Marker Analysis for Parkinson's Disease Classification using Multiscale Fuzzy Entropy and Functional Connectivity
102	616	Investigation of Performance Influencing Factors in Early-Stage Diabetic Retinopathy Detection Based on Deep Neural Network
103	621	Forecasting Generation Volumes and Simulating Automated Polymer Classification for Plastic Waste Management in India: A Dual-Model Feasibility Study
104	636	When There Is No Corpus
105	645	Barriers to Cloud-based Infrastructure as a Service Adoption in Higher Education: A Case Study in a Developing Economy
106	648	Variable Reduction for Prediction Model Optimization Using a Modified Genetic Algorithm with an Extreme Pairs Bi-Segmented Average Crossover (EPBAX) Operator
107	658	Design and Optimization of Advanced 5G Millimeter-wave Phased Array Antenna Using Soft Computing Approach
108	661	A Skill-Based Job Recommender System Driven by GitHub Portfolio Analysis
109	662	A Data-Driven Machine Learning Framework for Short-Term Rental Valuation: The Case of Athens
110	668	Reactive Power in Low Frequency NILM: a DTW Template-and-Subtract pipeline with edge deployable load forecasting
111	669	Uncertainty-Aware Healthcare Claims Payment Prediction Using Conformal Calibration

112	703	Constraint-Aware Technological Product Recommendations via Multi-Agent RAG Architecture
113	705	Institutional Benchmarking of Thailand's Solar PV Testing and Regulatory Ecosystem: Insights for Strengthening Philippine Solar PV Standards and Technical Capability Development
114	708	Design of a UML Profile for Modeling AI-Based Fraud Detection Systems in Financial Services
115	733	Multi-modal approach for Word Familiarity Classification using Eye Responses and EEG Signals
116	734	BiLSTM based BCI-Driven Approach for Classifying Attention State of Vehicle Drivers
117	741	A Two-Stage Framework for Textual Sign Recognition in Complex Traffic Environments
118	745	A Comparison Study on Deep Learning-Based Models for Traffic Sign Recognition
119	746	A Hybridized Schrödinger Optimizer with Hill Climbing for Solving the Pressure Vessel Design Optimization Problem
120	747	QPSO and QWOA: Novel Quantum-Based Swarm Task Scheduling Algorithms for Cloud Environments
121	749	Resynchronization-Free Freshness Validation Mechanism
122	755	A Markov Chain-Based Forecast of Solar Photovoltaic Technologies in the Philippines Using a National Solar PV Component Catalog Database
123	764	From Propositions to Prediction: A Machine Learning and Statistical Framework for Evaluating Employer Branding Factors in Gujarat's IT Industry
124	769	TimeGPT, LGBM and N-HITS models in Forecasting Time-series Electricity Load Data
